

Cookie Policy

Athletic Skills Company

At Athletic Skills Company, we use various types of cookies on our website(s). As a visitor, you have the ability to manage which types of cookies you permit. This means you decide which cookies we may use, allowing you to control your privacy settings.

This policy explains what cookies are, which cookies we may use, their purpose, and which ones can or cannot be disabled.

Our cookie policy is in accordance with Dutch privacy legislation.

What are cookies?

Cookies are small text files stored on your device when you visit a website. These files save information such as your preferences, enabling the website to remember you on subsequent visits. For example, cookies can keep you logged in, eliminating the need to log in each time you visit. In this way, cookies enhance user convenience.

When visiting a website, you will typically see a cookie banner — usually a pop-up — asking which cookies you would like to allow or decline. Your choices through this banner determine the level of privacy you prefer.

There are two types of cookies that are always active: functional and analytical cookies. These do not contain personal data and are essential for the proper functioning of the website. As a result, these cannot be disabled and have no impact on your privacy.

Other types of cookies — such as advertising cookies — can be accepted or declined via the cookie banner. If declined, they will not be stored. If accepted, they will be saved to your device and used accordingly.

Which cookies do we use?

Type of cookie	Cookie banner not accepted	Cookie banner accepted
Necessary cookies	Yes	Yes
Functional cookies	No	Yes
Analytical cookies	No	Yes
Advertising cookies	No	Yes

Necessary cookies

These are essential for basic website functions, such as secure logins and managing cookie preferences. They do not store any personally identifiable information.

Functional cookies

Functional cookies ensure the proper functioning of the website. They operate anonymously and do not involve the use of personal data, thus having little to no effect on your privacy. For instance, they can help keep you logged in.

Analytical cookies

These cookies help us understand how visitors use our website — for example, which pages are most frequently visited. Although not required for the website to function, they are always active and do not collect personal data, making them anonymous.

Advertising cookies

Advertising cookies are used to show personalised adverts based on your browsing history and to evaluate the effectiveness of advertising campaigns.

Cookies from providers such as Adobe and Google may collect your IP address, which is anonymised immediately. For more details, please refer to their respective privacy policies.

Our website may also contain video content and social sharing features that use cookies from YouTube and Google. These cookies recognise when you are logged in and track which pages you view or share.

For further information, please consult the YouTube Privacy Policy.

Privacy

To learn more about how we handle personal data, please read our Privacy Statement.

Adjusting, Blocking or Deleting Cookies

You can adjust your cookie preferences at any time by clicking the cookie settings link at the bottom of any page.

Alternatively, you can block cookies via your web browser (e.g. Firefox, Google Chrome, or Microsoft Edge). This will prevent any disallowed cookies from being stored. Please be aware that this may affect website functionality.

You may also delete cookies already stored in your browser — typically under the 'Privacy' or 'Security' settings.

If you prefer not to store any cookies from ASM, simply reject the optional cookies in our cookie banner. If the banner no longer appears, it is likely that a cookie has already been set. In this case, you should delete cookies via your browser settings before adjusting your preferences.
